RACIAL ORIGIN
BY CONJUGAL CONDITION, AGE, ETC.

ORIGINES RACIALES
SELON L'ÉTAT CONJUGAL, L'ÂGE, ETC.

This bulletin classifies the population of Canada by racial origin, showing for each origin the number of males and females by conjugal condition, age, religious denomination, birthplace, immigration and citizenship, official language and mother tongue, and schooling, as of the Census date, June 2, 1941. It completes a series of bulletins on racial origin issued separately for each province. In the bulletins for the provinces the data are given for cities of 30,000 population and over as well as for the province as a whole.

The term "racial origin" as used in the census has a combined biological, cultural and geographical implication. In certain cases all three aspects are fairly clearly defined; in others the classification means little more than geographical origin, being distinct from birthplace classification, however, mainly in that it includes not only immigrants, but also their descendants. Hence the Canadian born, as well as the foreign born, are included in the number of persons of various racial origins shown in the tables of this bulletin.

As a general rule, racial origin in the census is traced through the father. In the case of the Canadian aborigines the origin reported was Indian or Eskimo. Persons of the black, yellow, or brown races were enumerated as Negro, Chinese, Japanese, Hindu, Malayan, etc., respectively, thus indicating the branch within the distinct ethnic stock to which such persons belonged.

Dans ce bulletin, la population du Canada est classifiée selon l'origine raciale. Il indique, pour chaque origine, le nombre de personnes du sexe masculin et du sexe féminin selon l'état conjugal, l'âge, la religion, le lieu de naissance, l'immigration et la citoyenneté, la langue officielle et la langue maternelle, et les années passées à l'école, à la date du recensement, le 2 juin 1941. Il complète une série de bulletins sur l'origine raciale publiés pour chaque province en particulier. Dans les bulletins sur les provinces, les données s'étendent aux villes de 30,000 habitants et plus de même qu'à la province prise dans son ensemble.

L'expression "origine raciale", telle qu'employée dans le recensement, revêt un sens biologique, culturel et géographique. Dans certains cas, ces trois aspects sont assez clairement définis; dans d'autres, la classification signifie tout au plus l'origine géographique, se distinguant principalement de la classification selon le lieu de naissance en ce qu'elle comprend non seulement les immigrants mais aussi leurs descendants. Il s'ensuit que les nés canadiens aussi bien que les nés étrangers sont compris dans le nombre de personnes des diverses origines raciales énumérées dans les tableaux de ce bulletin.

Règle générale, l'origine raciale, pour les fins du recensement, se retrace à celle du père. Dans le cas des aborigènes du Canada, l'origine déclarée est indienne ou esquimaude. Les personnes de races noire, jaune ou brune sont énumérées comme Nègres, Chinois, Japonais, Hindous, Malais, etc., respectivement, indiquant ainsi la branche du groupe ethnique particulier auquel elles appartiennent.

(1) See footnote (1), Table 1, page 3. - Voir renvoi (1), tableau 1, page 3. (2) Includes years of schooling "not stated". - Comprend années d'école "non données". (3) The number of children under 15 years is shown by five-year age groups in this table. Since most children reporting school attendance are between 5 and 15 years of age, the number in this age group may be compared with the number reporting school attendance. In order that the population 10 years and over with less than 5 years of schooling may be compared by origin, the children under 10 years of age should be subtracted from the total in the schooling group 0 - 4 years - Le nombre d'enfants de moins de 15 ans est indiqué par groupes d'âge de cinq ans dans ce tableau. Comme la plupart des enfants qui déclarent leur fréquentation scolaire ont de 5 à 15 ans, le nombre dans ce groupe d'âge peut être comparé à celui des enfants qui déclarent leur fréquentation scolaire. Pour que la population de 10 ans et plus ayant moins de 5 années d'école puisse être comparée selon l'origine, les enfants de moins de 10 ans devront être soustraits du total dans le groupe de 0 - 4 ans, selon les années à l'école.
